

Meet your HOSPITALISTS

WHEN YOUR PHYSICIAN ADMITS YOU TO THE HOSPITAL, he or she may call on a hospitalist to manage your stay. Hospitalists are highly trained internal medicine or family practice doctors and nurse practitioners. They do not have regular offices because they only see patients in the hospital. This allows your physician to continue to care for patients in the office practice while a colleague specializing in inpatient care sees you in the hospital. The hospitalist and your primary care physician are in close contact during your stay. To speak to the hospitalist RN, dial 828.586.7428

CASEY PRENGER, MD

COLLEGE OF MEDICINE

Thank you for choosing

HARRIS

REGIONAL HOSPITAL

A Duke LifePoint Hospital

SWAIN

COMMUNITY HOSPITAL

A Duke LifePoint Hospital

We re honored to care for you.

Have questions about your
Medical Records?

We are happy to provide easy access to your Medical Records.

- The Medical Records department is located on the first floor at Harris Regional Hospital, just past the Gift Shop and Chapel.
- You may call ahead and request that your records be ready for pick-up. 828.586.7175.
- Please allow up to 5 days for non-emergency requests. (There is a shorter turn-around time for smaller requests or for patient care requests.)
- You may designate another person to pick up your records. Please provide a written statement including the date, your date of birth (DOB), and your signature indicating what records are being released and to whom.
- You or a person designated to pick up your records must show a photo ID and sign to indicate that the records have been received.
- Legal representatives or surviving spouses of deceased patients may provide legal documentation to gain access to a patient's medical records.
- Your primary care physician or a physician on staff who is ordering a procedure for you may request a copy of your records without signed authorization. All other physicians requesting records must have your signed authorization.
